

# Stanislav Boichenko

Senior .NET Engineer with 10+ years of experience in designing and developing scalable backend systems, primarily in healthcare, e-commerce, and real estate domains. Skilled in C#/.NET (Framework & Core), MS SQL, RabbitMQ, Azure, and legacy modernization. Proven track record of delivering new projects from scratch, optimizing existing architectures, and mentoring mid-level developers. Certified Azure Developer and Administrator. Strong background in building reliable, high-load applications with CI/CD and Agile practices, with recent focus on healthcare solutions involving medical imaging and secure data processing.

## Experience

March 2019 - Now - Software developer (backend) in Glorium Technologies. Working at this company I grew up as a professional from middle+ level to a senior+, took part at several interesting and sometimes challenging **projects**:

### APR 2023 - Now / Remote / Healthcare

Description: Software/infrastructure around medical scanners: store/transfer/view DICOM images, configure scanners, communicate with external systems. The project was already in production when I started, but there was a place to write something new, not only legacy support.

#### Duties:

- fix bugs and develop new services from scratch,
- take part in architecture discussions,
- write stories,
- fix builds,
- mentored two middle developers

Tech stack: c#/.net (web - api/wcf; desktop - wpf), mssql, rabbitmq, installShield, jenkins; to a lesser extent, but also contributed in c++, php, python, vue.js

### AUG 2022 - SEP 2023 / Remote / Healthcare | e-commerce

Description: Medical supplies online shop - new project from scratch

Duties: plan, design and develop backend application from scratch (restful api, database, mailing (ses), third party integrations - fedex/quickbooks)

Tech stack: aws, mysql, .net 6

## SEP 2019 - JUL 2022 / Remote / Real Estate

Description: property management software with cash flow forecasting functionality. It was a mature project when I started, I was implementing new functionality into existing system

Duties: developing new features (ui/backend) - mostly reports or forms with calculations; fixing bugs, writing unit tests

Tech stack: web forms (both VB and C#), mssql, ssrs, azure functions, redis, frontend - ext.js (ext.Net)

## JUN 2019 - JUN 2020 / Kyiv-Remote / Healthcare

Description: online treatment software for dentistry -- appointments schedule, doctor notes, online examination with web camera

Duties: design and develop an application from scratch - peer-to-peer web conference, calendar, notes.

Tech stack: .net core 3.1, webRtc+janus, docker

## MAY 2019 - AUG 2019 / Kyiv / Legal Tech

Description: ML-based legal advisor for the US. This was a relatively new project, but with ready-to-work backlog and developed architecture.

Duties: development of new features (backend), sometimes - ui fixes

Tech stack: .net core 3.1, Azure Cosmos DB, Azure ML, frontend - angular

## MAR 2019 - JUN 2019 / Kyiv / Healthcare

Description: intranet software for faxing. First "warm-up" project in the company

Duties: rewrite backend part from mvvm (silverlight) to restful api to make it consumable by the angular frontend.

Tech stack: .net framework 4.7, ms sql

## FEB 2016 - FEB 2019 / Kyiv / Software developer (full stack) in SmartTender

SmartTender was born as a module of the IT Enterprise ERP system. It was an old but stale project when I started. With the team we added government procurements/sales (Prozorro), redesigned both UI and business logic of the commercial (SmartTender-only) trades

Duties:

- business features implementation
- post-release support, communication with customers (SmartTender clients, customers of IT Enterprise ERP with ECT module)
- business feature solution design and estimations
- requirement analysis
- working as a part of Scrum team

Tech stack: back-end - mostly C#, asp.net MVC, wcf, ssrs, less ironPython, mssql; front-end - HTML/CSS/JavaScript (Vue.js)

## MAY 2015 - FEB 2016 / Kyiv / Software developer in IT-Enterprise

APS module's adaptation of IT Enterprise ERP for Roshen project

Duties: business features implementation, bug fixing

Tech stack: c#, mssql, ssrs

## Education

Institute of Telecommunication Systems, NTUU KPI, Kyiv Ukraine

- 2014 - 2016 - Master degree
- 2010 - 2014 - Bachelor degree

## Hard skills

- C#/.net and ecosystem (wpf, wcf, signalr, asp.net, identity server, unit testing platforms, etc)
- MS SQL Server, T-Sql (ORMs Entity Framework, Entity Spaces, NHibernate, Dapper)
- JavaScript
- Docker
- RabbitMq
- MS Azure
- GoF patterns

## Credentials

- Azure Developer Associate  
<https://learn.microsoft.com/api/credentials/share/en-us/stanislav-3836/7B881F296BC434DD?sharingId=A86B89C04D00AD2B>
- Azure Administrator Associate  
<https://learn.microsoft.com/api/credentials/share/en-us/stanislav-3836/74E8B0D92FB05532?sharingId=A86B89C04D00AD2B>
- Various Stripe developer/architect credentials
